

**Amendments to the Abstract**

Please replace the abstract of the disclosure with the following amended abstract of the disclosure.

There is provided a system for broadcasting requested pieces of music utilizing an information system in which operators for receiving requests for pieces of music for a broadcast program are eliminated when receiving the requests; classified totals of pieces of music requested by users with personal computers and portable telephones are computed according to predetermined rules; and, for example, pieces of music receiving many votes are selected with one click and broadcasted. ~~User terminals and a web server are connected through the internet; a database in which data of pieces of music that can be requested are stored is connected to said web server; a broadcasting system for transmitting sounds, images, pieces of music, texts, and so on and a computer for a staff are connected to said database through a management server; selections from among said pieces of music requested by said terminals are received by said web server; classified totals are computed by said management server; and pieces of music selected with one click or automatically at said computer for the staff are broadcasted by said broadcasting system.~~
